

Reassignment of Q1 and Q5 Firm-Year Observations Relative to Observed Quality

Panel A: Share of observed tail assignments that change

Panel B: Destination of changed observed-tail assignments

Notes: The figure uses firm-year portfolio assignments from current_res. Panel A reports the share of firm-years assigned to Q1 or Q5 under Observed Quality that are not assigned to the same tail under each alternative method. Panel B decomposes those changes by destination, measured as a share of the corresponding observed tail.
